

# How you're attracting pests in your home

You probably might know this that pests come for food. This is true, pest does come for food and water. But even if you've adopted the preventive measure, there's still chance that pest is roaming in your house.

## Unrepaired leakage

Leakage causes moisture, which creates a humid atmosphere and pests love humidity. Find any leakage and fix it, in order to maintain a dry and clean atmosphere.

## Not filling cracks and covering gaps

Wall cracks and gaps where light doesn't reach becomes the shelter for pests. Use some filings to fill those gaps and cracks.

# Storing clutter in your home

Clutters like newspaper or boxes with useless items become home for pests. They like hiding there and sometimes lay their eggs and give births to their babies.

## Why hire professionals to remove pests
